RECENSEMENT DU CANADA 1971

Population and
housing characteristics
by census tracts

Caractéristiques de la
population et du logement
par secteur de recensement

VICTORIA

INTRODUCTION

This report is one of the "B" Series presenting, for census tracts, basic population and housing data that were collected on a 33 1/3 p.c. sample basis. The population is classified according to such characteristics as ethnic group, religion, schooling, language, migration, fertility and by economic characteristics such as occupation, industry and income. Housing classifications include value of home, rent, length of occupancy, period of construction and living conveniences. Characteristics that were collected on a 100 p.c. basis are included in the "A" Series of Census Tract Reports. Since the information in this report was collected on a sample basis, the population for a given census tract or other geographic area may differ from that shown in reports collected on a 100 p.c. basis. The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-710 and 95-701 to 95-729).

Census tracts are defined as small permanent census statistical areas that have been established in thirty of the large urban communities, in co-operation with local authorities. The following criteria were used to delineate these areas: (1) a population between 2,500 and 8,000, except for tracts in the central business district and for institutional tracts, either of which may have a smaller population; (2) an area as homogeneous as possible in terms of economic status and living conditions; (3) boundaries that follow permanent and easily recognizable geographic features; (4) a shape as compact as possible. To be included in the census tract programme, the central city must have had a minimum population of 50,000 at the previous census.

Urban communities included in the 1971 Census Tract Programme are as follows: St. John's, Nfld.; Halifax, N.S.; Saint John, N.B.; Montreal, Quebec, Sherbrooke and Trois-Rivières, Que.; Ottawa — Hull, Que. and Ont.; Brantford, Guelph, Hamilton, Kingston, Kitchener, London, Oshawa, Peterborough, St. Catharines — Niagara, Sarnia, Sault Ste. Marie, Sudbury, Thunder Bay, Toronto and Windsor, Ont.; Winnipeg, Man.; Regina and Saskatoon, Sask.; Calgary and Edmonton, Alta.; Vancouver and Victoria, B.C.

For the 1971 Census, the Census Tract numbering system was completely revised, and a uniform system to allow for comparability with future censuses was adopted. The tracts of the largest urban centre were numbered first, followed by the tracts in surrounding municipalities within the same census division, and finally, by the tracts in other divisions. A revision table showing the relationship between the 1971 and 1966 tracts is included in the final pages of the report for each city whose tract numbering has been revised. This does not apply to Sherbrooke, Brantford, Guelph, Sault Ste. Marie or Thunder Bay.

An index map showing the relative locations of the 1971 tracts is included in this report. Explanations of terms used in the statistical table, and references to measures of the reliability of the data, are also included in the final pages.

The 1971 figures in this report have been subjected to the confidentiality procedure introduced in the 1971 Census to prevent the possibility of associating small figures with any identifiable individual. Briefly, it involves the random rounding of all last or unit digits. Since totals are independently rounded, they do not necessarily equal the sum of rounded figures in distributions. Also, there may be slight differences between comparable figures in this report and those in other census bulletins. This technique will be described in the reports of the 1971 Census volume series.

Le présent bulletin fait partie de la série "B" des publications sur les secteurs de recensement. Il présente les données de base sur la population et le logement qui ont été recueillies par un échantillonnage de 33 1/3 %. La population est classée selon des caractéristiques telles que le groupe ethnique, la religion, la scolarité, la langue, les migrations et la fécondité ainsi que selon des caractéristiques économiques telles que la profession, l'activité économique et le revenu. Quant aux logements, ils sont groupés selon la valeur du logement, le loyer, la durée d'occupation, la période de construction et les éléments de confort. Les caractéristiques qui ont été obtenues au moyen de questions s'adressant à toute la population figurent dans les bulletins de la série "A". Parce que les renseignements de la présente publication ont été recueillis par échantillonnage, les chiffres de la population pour un secteur de recensement ou autre région géographique donné ne sont pas forcément les mêmes que ceux des publications, recueillis à 100 p. 100. Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir publications nos 92-710 et 95-701 à 95-729 au catalogue).

Les secteurs de recensement sont des petites unités statistiques permanentes établies dans trente grandes villes avec l'aide d'un comité local. Ils sont délimités selon les critères suivants: 1) population de 2,500 à 8,000 habitants, sauf pour les secteurs du centre des affaires ou les secteurs d'institution, qui peuvent avoir une population plus faible; 2) la plus grande homogénéité possible du point de vue économique et social; 3) limites qui coïncident avec des lignes permanentes facilement reconnaissables sur le terrain; 4) dans la mesure du possible, une forme compacte. Pour être comprises dans le Programme de secteurs de recensement, les villes-centres devaient compter au moins 50,000 habitants au recensement précédent.

Voici les villes qui ont été retenues lors du recensement de 1971: St-Jean (T.-N.); Halifax (N.-É.); Saint-Jean (N.-B.); Montréal, Québec, Sherbrooke et Trois-Rivières (Québec); Ottawa — Hull (Québec et Ont.); Brantford, Guelph, Hamilton, Kingston, Kitchener, London, Oshawa, Peterborough, St. Catharines — Niagara, Sarnia, Sault Ste. Marie, Sudbury, Thunder Bay, Toronto et Windsor (Ont.); Winnipeg (Man.); Regina et Saskatoon (Sask.); Calgary et Edmonton (Alb.); Vancouver et Victoria (C.-B.).

Pour le recensement de 1971, la numérotation des secteurs de recensement a été entièrement révisée; on a adopté en outre un système uniforme qui permettra des comparaisons avec les recensements à venir. On a numéroté d'abord les secteurs du plus grand centre urbain, puis ceux des municipalités environnantes comprises dans la même division de recensement, et enfin les secteurs des autres divisions. Dans les dernières pages de la publication, une table de révision indique le rapport entre les secteurs de 1971 et de 1966 dans chaque ville dont la numérotation des secteurs a été modifiée. Cette révision ne s'applique pas à Sherbrooke, Brantford, Guelph, Sault Ste. Marie et Thunder Bay.

On trouvera dans le bulletin une carte-index indiquant la localisation des secteurs de 1971 et, à la fin, des explications sur les termes utilisés dans le tableau statistique ainsi que des notes sur la fiabilité des données.

Par souci de confidentialité les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. En un mot, cette technique consiste à arrondir au hasard tous les derniers chiffres, c'est-à-dire les chiffres représentant les unités. Ainsi, tous les chiffres ayant été arrondis séparément, leur somme ne donne pas nécessairement les totaux indiqués. Il peut également y avoir de légères différences entre des chiffres comparables de ce bulletin et ceux d'autres bulletins du recensement. Une description de cette technique figurera dans les bulletins de la série des volumes du recensement de 1971.

TABLE 1. Population Characteristics by Census Tracts, 1971

| No. | Characteristics | Metro- politan area - Région métropo- litaine | Victoria, c. | | | | | | | | | | | |

EXPLANATIONS OF CENSUS TERMS

Note: In the column headings of the table, c. = city; t. = town; vl. = village; mun. = municipality; twp. = township; L.I.D. = Local Improvement District; par. = parish; b. = borough; R.D. = Regional District.

Period of immigration

Persons born outside Canada reported the year (or period) when they first came to live in Canada.

Ethnic group

In the census, a person's ethnic group is traced through his father. In 1971, each person was asked to reply to the question: "To what ethnic or cultural group did you or your ancestor (on the male side) belong on coming to this continent?". Language spoken by the person or by his paternal ancestor on first coming to this continent was a guide to the determination of a person's ethnic group in some cases. Note that British Isles includes English, Irish, Scottish and Welsh, and that Scandinavian includes Danish, Icelandic, Norwegian and Swedish.

Religion

In the 1971 Census, respondents were asked to give a specific religious body, denomination, sect or community in answer to the question "What is your religion?", even if they did not attend a place of worship. Provision was made for marking "no religion" if the person considered this to be an appropriate answer.

Language most often spoken at home

Refers to the language spoken most frequently by the person in the home. Respondents speaking two or more languages reported the one which, in their opinion, they used most frequently. Persons living alone reported the language spoken most frequently in their daily routine.

Official language

The term "official language" refers to the ability to carry on a conversation of some length on various topics in either of the official languages of Canada (English and French). It should be noted that persons speaking either or both of the official languages may also speak other languages and may have a mother tongue other than English or French.

School attendance and years of schooling

Population 5 years and over attending either full-time or part-time at any type of educational institution since September 1970 was included in answer to the question: "Have you attended school or university since last September?". A person was considered as attending full-time if he took 75 per cent or more of the normal course load in the grade or year in which he was registered.

The highest level of schooling refers to the highest grade or year of elementary school, secondary school or university attended and whether or not additional training in the form of vocational and/or post-secondary non-university was obtained. Persons with no schooling, who were not attending full-time, were included in the category: "Less than Grade 9".

Migration

Under this heading, the population 5 years and over is classified as **migrants** and **non-migrants**. Migrants are persons whose place of residence five years prior to the census was outside the municipality in which they were residing at the census date. Non-migrants are persons who were residing in the same municipality five years prior to the census, even though they may have changed dwellings within the municipality or have moved out of the municipality and returned to it within the five-year period.

DÉFINITIONS DES TERMES DE RECENSEMENT

Note: Les abréviations utilisées dans les tableaux sont: c. = cité; v. = ville; vl. = village; mun. = municipalité; twp. = township; D.A.L. = district d'amélioration locale; par. = paroisse; b. = borough; D.R. = district régional.

Période d'immigration

Les personnes nées à l'extérieur du Canada ont indiqué l'année (ou la période) où elles sont arrivées au Canada pour la première fois avec l'intention d'y demeurer.

Groupe ethnique

Au recensement, le groupe ethnique d'une personne est déterminé par celui du père. En 1971, chaque personne devait répondre à la question: "À quel groupe ethnique ou culturel appartenait votre ancêtre paternel (ou vous-même) à son arrivée sur le continent?". La langue parlée par le recensé ou par son ancêtre paternel à son arrivée en Amérique pouvait servir de guide pour déterminer le groupe ethnique dans certains cas. À noter que: "britannique" comprend anglais, irlandais, écossais et gallois, et que "scandinave" comprend danois, islandais, norvégien et suédois.

Religion

Au recensement de 1971, le recensé devait indiquer un organisme, une confession, une secte, une communauté ou un culte précis en réponse à la question "Quelle est votre religion?", même s'il était non-pratiquant. Chacun avait la faculté d'indiquer "aucune religion", s'il le désirait.

Langue d'usage

Langue la plus souvent parlée à la maison. Pour les personnes parlant deux langues ou plus, la langue d'usage est celle qu'elles estiment utiliser le plus souvent. Pour les personnes seules, c'est la langue qu'elles utilisent le plus souvent dans la vie de tous les jours.

Langue officielle

La "langue officielle" est déterminée par la possibilité de soutenir une conversation sur divers sujets dans l'une ou l'autre des langues officielles du Canada (le français et l'anglais). Les personnes parlant l'une ou l'autre des langues officielles ou les deux peuvent également parler d'autres langues et leur langue maternelle peut être autre que le français ou l'anglais.

Fréquentation scolaire et années de scolarité

Les personnes de 5 ans et plus fréquentant l'école à plein temps ou à temps partiel dans un établissement d'enseignement depuis septembre 1970 étaient incluses en réponse à la question: "Avez-vous fréquenté l'école ou l'université depuis septembre dernier?". La fréquentation scolaire est à plein temps lorsqu'on suit 75 % ou plus des cours qui se donnent normalement au niveau où l'on est inscrit.

Le niveau de scolarité atteint correspond à la dernière année d'études primaires, secondaires ou universitaires, qu'il y ait eu ou non d'autre formation professionnelle postsecondaire non universitaire. Les personnes n'ayant aucune scolarité et qui ne fréquentaient pas l'école à plein temps entrent dans la catégorie: "N'ayant pas atteint la 9^e année".

Migration

Sous cette rubrique, la population de 5 ans et plus est classée comme **migrants** et **non-migrants**. Les migrants sont les personnes dont le lieu de résidence cinq ans avant le recensement était en dehors de leur municipalité de résidence le jour du recensement. Les non-migrants sont les personnes qui demeuraient dans la même municipalité cinq ans avant le recensement, même si, entre-temps, elles ont changé de logement dans la municipalité ou sont parties et revenues dans la municipalité.

Women ever married

Women 15 years and over, identified as married, widowed, divorced or separated under "marital status" are included in this classification.

Value

Figures for "value" relate to single detached owner-occupied non-farm dwellings only. The dwelling value is based on the amount expected, if the dwelling were to be sold to a willing buyer.

Mortgage

Data for mortgaged dwellings include all debts on single detached owner-occupied non-farm dwellings.

Rent

Figures for "cash" rent relate to tenant-occupied, non-farm dwellings only, regardless of type. Averages have been determined on the basis of "stated" rent, excluding cases in which "no cash rent" was paid.

Length of occupancy

Refers to the period during which the Head of the household has continuously occupied the dwelling.

Period of construction

Refers to the date of completion of the original building, not to any later remodeling, additions or conversions. Figures for 1971 extend to June 1, 1971 only.

Vacation home (owned)

Refers to a home owned by a member of the household and used only for vacation or recreational purposes on a seasonal basis. This term does not include trailers, houseboats or other movable dwellings.

Automobile

Includes any car or station-wagon owned or operated by a member of the household, if used at least part-time for non-business purposes. Not included are panel or other trucks, or passenger cars used entirely for business purposes.

Gas as principal heating fuel

Piped and bottled gas are included under this heading.

Labour force

Refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours.

Participation rate

Refers to the percentage the labour force forms of the population 15 years and over in the category or area.

Employed

Refers to all non-inmates 15 years and over who, during the week prior to enumeration, worked for pay or profit, or helped

Femme non célibataire

Femme de 15 ans et plus qui est mariée, veuve, divorcée ou séparée.

Valeur

Les "valeurs" données ne s'appliquent qu'aux individus non attenants, non agricoles, occupés par leur propriétaire. La valeur du logement est le montant que s'attendrait de recevoir le propriétaire s'il vendait le logement à un acheteur libre.

Hypothèque

Comprend toute dette grevant un logement individuel non attenant, non agricole, occupé par son propriétaire.

Loyer

Les chiffres pour le "loyer en espèces" se rapportent seulement aux logements non agricoles occupés par des locataires, peu importe leur genre. Les moyennes ont été déterminées d'après le loyer "déclaré", sauf dans les cas où il n'était pas payé de loyer en espèces.

Durée d'occupation

Période durant laquelle le chef de ménage a demeuré de façon ininterrompue dans son logement.

Période de construction

Date où la construction initiale du logement a été achevée, par opposition à la date de rénovations, rajouts ou modifications ultérieures.

Maison de villégiature

Habitation appartenant à un membre du ménage et utilisée en saison comme lieu de villégiature ou pour les loisirs. Ne sont pas compris les roulottes, les bateaux ni les autres habitations mobiles.

Automobile

Voiture particulière ou familiale appartenant à un membre du ménage ou conduite par lui, si elle sert au moins à temps partiel à des fins non commerciales. Ne sont pas compris les camionnettes ou autres camions, ni les voitures particulières qui servent exclusivement à des fins commerciales.

Gaz comme principal combustible utilisé pour le chauffage

Le gaz canalisé et le gaz en bouteille ou en bonbonne sont compris sous cette rubrique.

Population active

Non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes ne faisant que des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou entreprise familiale.

Taux d'activité

Pourcentage de la population active par rapport à la population totale de 15 ans et plus de la catégorie ou du secteur donné.

Occupé

Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre

(without pay) in a family business or farm. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc., providing they were not also looking for work.

Unemployed

The unemployed consists of all non-inmates 15 years and over who, during the week prior to enumeration, were not working but were looking for work, or were on temporary lay-off; or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

Occupation major group

Occupation refers to the specific kind of work the person did in his or her job, as determined by reporting the kind of work, description of most important duties and job title. Data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week, or to the job of longest duration since January 1, 1970 if not employed in that week. Data, therefore, exclude those persons in the labour force who were looking for work but had not worked since January 1, 1970 or had never worked. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours.

The detailed occupation data are grouped within three levels of classification, the Occupation Major Groups, Minor Groups and Unit Groups. The Major Groups shown are as follows:

Totals — All occupations, including Major Group 00, Occupations not stated.

Group 11 — Managerial, Administrative and Related Occupations
Group 27 — Teaching and Related Occupations
Group 31 — Occupations in Medicine and Health
Group 21 — Occupations in Natural Sciences, Engineering and Mathematics
Group 23 — Occupations in Social Sciences and Related Fields
Group 25 — Occupations in Religion
Group 33 — Artistic, Literary, Recreational and Related Occupations

Group 41 — Clerical and Related Occupations
Group 51 — Sales Occupations
Group 61 — Service Occupations
Group 71 — Farming, Horticultural and Animal Husbandry Occupations
Group 73 — Fishing, Hunting, Trapping and Related Occupations
Group 75 — Forestry and Logging Occupations
Group 77 — Mining and Quarrying including Oil and Gas Field Occupations
Group 81/82 — Processing Occupations
Group 83 — Machining and Related Occupations
Group 85 — Product Fabricating, Assembling and Repairing Occupations
Group 87 — Construction Trades Occupations
Group 91 — Transport Equipment Operating Occupations

Other (for males) — Materials Handling and Related Occupations, n.e.c., Other Crafts and Equipment Operating Occupations and Occupations Not Elsewhere Classified.

Other (for females) — Same groups as for males, plus Groups 87 and 91.

For further information on the occupation classification, see "Occupational Classification Manual, Census of Canada, 1971", Volume I, Catalogue No. 12-536.

rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale. Sont également comprises les personnes qui avaient un emploi dont elles étaient temporairement absentes à cause d'une maladie, de vacances, d'une grève, etc., à condition qu'elles n'aient pas également cherché du travail.

En chômage

Les chômeurs sont tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ne travaillaient pas, mais cherchaient du travail ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable disponible dans la localité.

Grand groupe professionnel

La profession est le genre de travail que faisait le recensé, déterminé par l'indication du genre de travail, la description des fonctions principales et le titre de l'emploi. Les données portent sur l'emploi du recensé au cours de la semaine précédant le dénombrement, s'il avait un emploi cette semaine-là, ou sur l'emploi de plus longue durée depuis le 1er janvier 1970, s'il n'avait pas d'emploi cette semaine-là. Les données excluent donc les actifs qui cherchaient du travail, mais qui n'avaient pas travaillé depuis le 1er janvier 1970 ou qui n'avaient jamais travaillé. Les personnes ayant deux emplois ou plus pendant la semaine de référence devaient fournir des renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures.

Les données de la liste des professions détaillée sont groupées dans les trois niveaux de classification, des grands groupes, des sous-groupes et des groupes de base. Les grands groupes sont les suivants:

Totaux — Toutes les professions, y compris le grand groupe 00, Professions non déclarées.

Groupe 11 — Direction, administration et professions connexes
Groupe 27 — Enseignement et secteurs connexes
Groupe 31 — Médecine et santé
Groupe 21 — Sciences naturelles, génie et mathématiques

Groupe 23 — Sciences sociales et secteurs connexes
Groupe 25 — Religion
Groupe 33 — Arts plastiques, décoratifs, littéraires, d'interprétation et secteurs connexes
Groupe 41 — Travail administratif et secteurs connexes
Groupe 51 — Commerce
Groupe 61 — Services
Groupe 71 — Agriculture, horticulture et élevage

Groupe 73 — Pêche, chasse, piégeage et activités connexes
Groupe 75 — Exploitation forestière
Groupe 77 — Mines, carrières, puits de pétrole et de gaz

Groupe 81/82 — Traitement des matières premières
Groupe 83 — Usinage des matières premières et secteurs connexes
Groupe 85 — Fabrication, montage et réparation de produits finis

Groupe 87 — Construction
Groupe 91 — Transports

Autres (pour hommes) — Manutention et secteurs connexes, n.c.a., conduite de machines et d'appareils divers et activités non classées ailleurs*.

Autres (pour femmes) — Les mêmes groupes que pour les hommes, plus les groupes 87 et 91.

Pour plus de renseignements sur la classification des professions, voir "La classification des professions, Recensement du Canada, 1971", volume I (n° 12-536F au catalogue).

* Ce grand groupe est identifié par le terme "Activités mal désignées" dans "La classification des professions, Recensement du Canada, 1971".

Industry division

The industry classes are based on the general nature of the business carried out in the establishment where the respondent was employed as indicated by the reporting of the name of his or her employer (or own business name if self-employed) and the kind of business, industry or service engaged in by this establishment. If not employed in the week prior to enumeration, the information was to relate to the respondent's job of longest duration since January 1, 1970. Data, therefore, exclude those persons in the labour force who were looking for work but had not worked since January 1, 1970 or have never worked. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

The detailed industry data are grouped within three levels of classification: the Industry Division, Major Group and Class. The Divisions shown are as follows:

Total — All industries including Division 12, Industry unspecified or undefined.

- Division 1 — Agriculture
- Division 2 — Forestry
- Division 3 — Fishing and Trapping
- Division 4 — Mines (including Milling), Quarries and Oil Wells
- Division 5 — Manufacturing Industries
- Division 6 — Construction Industry
- Division 7 — Transportation, Communication and Other Utilities
- Division 8 — Trade
- Division 9 — Finance, Insurance and Real Estate
- Division 10 — Community, Business and Personal Service Industries
- Division 11 — Public Administration and Defence

For further information on the industrial classification, see the "Standard Industrial Classification Manual", Dominion Bureau of Statistics, 1970, Catalogue No. 12-501.

Class of worker

Refers to the classification of employment according to whether a person mainly worked for someone else for wages, or helped without pay in a family farm or business, or mainly worked for himself with or without paid help in his job in the week prior to enumeration, or if not employed at that time, in his job of longest duration since January 1, 1970. The labour force data by class of worker (and occupation and industry) therefore, exclude persons looking for work who had not worked since January 1, 1970 or who had never worked. The totals shown include unpaid family workers.

Wage-earners

Refers to persons 15 years and over who indicated that in the job reported they were mainly working for wages, salaries, tips or commissions or were self-employed in an incorporated company.

Self-employed

Refers to persons 15 years and over for whom the job reported consisted mainly of self-employment (including partnership) in their own unincorporated business, professional practice or farm, with or without paid help.

Persons who worked in 1970

Refers to persons 15 years and over, who reported having worked during one or more weeks in 1970, even for a few days. This includes weeks of paid vacation or sick leave or paid absence on training courses. "Work" implies work for "pay or profit", self-employment, unpaid work in a family farm or business, and work for payment "in kind" in a non-family enterprise.

Division d'activité économique

Les divisions d'activité économique sont fondées sur la nature générale de l'activité de l'établissement employant le recensé, déterminée par le nom de l'employeur (ou par le nom de sa propre entreprise s'il travaille à son compte) et par le genre de commerce, d'industrie et de service dont s'occupe l'établissement. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le dénombrement, les renseignements devaient porter sur son emploi de plus longue durée depuis le 1er janvier 1970. Sont donc exclus les actifs qui cherchaient du travail mais qui n'avaient pas travaillé depuis le 1er janvier 1970 ou qui n'avaient jamais travaillé auparavant. Les personnes ayant deux emplois ou plus devaient fournir des renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures.

Les données détaillées sur les activités économiques sont classées à trois niveaux: les divisions d'activité économique, les grands groupes et les classes. Les divisions sont les suivantes:

Total — Toutes les activités, y compris la Division 12, Activités indéterminées et imprécises.

- Division 1 — Agriculture
- Division 2 — Forêts
- Division 3 — Chasse et pêche
- Division 4 — Mines (y compris broyage), carrières et puits de pétrole
- Division 5 — Industries manufacturières
- Division 6 — Bâtiment et travaux publics
- Division 7 — Transports, communications et autres services publics
- Division 8 — Commerce
- Division 9 — Finances, assurances et affaires immobilières
- Division 10 — Services socio-culturels, commerciaux et personnels
- Division 11 — Administration publique et défense

Pour plus de renseignements sur la classification des activités économiques, voir la "Classification des activités économiques", Bureau fédéral de la statistique, 1970 (n° 12-501F au catalogue).

Statut

Classement des personnes occupées suivant qu'elles ont surtout travaillé contre rémunération, qu'elles ont travaillé sans rémunération dans une entreprise ou une ferme familiale ou qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi qu'elles occupaient au cours de la semaine précédant le dénombrement ou, si elles n'avaient pas travaillé au cours de cette semaine, dans leur emploi de plus longue durée depuis le 1er janvier 1970. Par conséquent, les données sur la population active selon le statut (et la profession et l'activité économique) excluent les personnes qui cherchaient du travail et qui n'avaient pas travaillé depuis le 1er janvier 1970 ou qui n'avaient jamais travaillé auparavant. Les totaux indiqués comprennent les travailleurs familiaux non rémunérés.

Salariés

Personnes de 15 ans et plus qui ont indiqué que, dans leur emploi, elles travaillaient surtout contre rémunération, à la commission ou pour des pourboires ou qu'elles travaillaient à leur propre compte dans une entreprise constituée en corporation.

Travailleur indépendant

Personnes de 15 ans et plus qui ont indiqué que leur emploi consistait surtout en travail autonome (y compris en association) dans leur entreprise non constituée en corporation, leur profession ou leur ferme, avec ou sans aide rémunérée.

Personnes ayant travaillé en 1970

Personnes de 15 ans et plus qui ont déclaré avoir travaillé une semaine ou plus en 1970, ne fût-ce que quelques jours. Cela comprend les semaines de vacances payées, de congé de maladie ou de congé de formation payé. "Travail" veut dire travail contre "rémunération ou en vue d'un bénéfice", travail à son propre compte, travail sans rémunération dans une entreprise ou une ferme familiale, ou travail contre rémunération "en nature" dans une entreprise non familiale.

Household

For census purposes, a household consists of a person or group of persons occupying one dwelling. It usually consists of a family group with or without lodgers, employees, etc. However, it may consist of two or more families sharing a dwelling, of a group of unrelated persons or of one person living alone. Every person is a member of some household and there is a one-to-one relationship between households and occupied dwellings except in the case of certain special households, such as those of military and diplomatic personnel stationed overseas, from which no housing information was collected.

Family

A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

Persons not in families

This term refers to those living alone; those living with unrelated individuals and those living with relatives but not in a husband-wife or parent-child relationship.

Total income

Refers to the total income received during 1970 from wages and salaries, business or professional practice, farm operations, family and youth allowances, government old age pensions, other government payments, retirement pensions from previous employment, bond and deposit interest and dividends, other investment sources, and other sources.

Employment income

Refers to the total of income received in 1970 as wages and salaries, net income from business or professional practice and/or net farm income.

Household income

Refers to the sum of the incomes received by all members of the household 15 years and over, from all sources, during the calendar year 1970.

Family income

Refers to the sum of the incomes received by all members of the family 15 years and over, from all sources, during the calendar year 1970.

Total and employment incomes of "under \$..."

In the case of total population, these figures include persons reporting losses, but exclude those reporting no income. However, in the case of households, families and persons not in families, these figures include both those reporting losses and those reporting no income.

Average and median incomes

For individuals and family/household heads, these figures are calculated only for persons reporting income. In the case of families, households and non-family persons, however, these figures are calculated for all families, households or non-family persons, respectively. Average and median employment incomes for individuals are calculated only for persons reporting some income from employment. All medians are calculated from the grouped data shown.

Ménage

Aux fins du recensement, un ménage est formé d'une personne ou d'un groupe de personnes occupant un logement. Il se compose ordinairement d'un groupe familial, avec ou sans chambreurs, employés, etc. Il peut aussi se composer d'un groupe de personnes non apparentées, de deux familles ou plus partageant le même logement ou d'une personne seule. Toute personne est membre d'un ménage quelconque et le nombre de ménages est égal au nombre des logements occupés, sauf dans le cas de certains ménages spéciaux (les ménages des militaires et des membres du corps diplomatique en poste outre-mer, par exemple) pour lesquels on n'a pas recueilli de données relatives au logement.

Famille

Une famille de recensement se compose de l'époux et de l'épouse avec ou sans enfants célibataires (peu importe leur âge) ou de l'un ou l'autre des parents avec un ou plusieurs enfants célibataires vivant dans le même logement. Une famille peut être formée également d'un homme ou d'une femme vivant avec un enfant en tutelle ou un pupille de moins de 21 ans pour lequel il (elle) ne reçoit pas de rétribution.

Personnes ne faisant pas partie d'une famille

Personnes seules; personnes vivant avec des parents auxquels elles se rattachent par d'autres liens que des liens conjugaux ou des liens de filiation.

Revenu total

Revenu total, reçu en 1970, provenant de la rémunération, de l'exploitation d'une entreprise ou d'une ferme, de l'exercice d'une profession pour compte propre, d'allocations familiales et d'allocations aux jeunes, d'une pension de vieillesse de l'État, d'autres sources publiques, de pensions de retraite relatives à un emploi antérieur, d'intérêts d'obligations et de dépôts et de dividendes, d'autres placements, et d'autres sources.

Revenu de l'emploi

Revenu total reçu en 1970 sous forme de rémunération, de revenu net provenant de l'exploitation d'une entreprise ou de l'exercice d'une profession pour compte propre et (ou) de revenu agricole net.

Revenu du ménage

Somme des revenus de toutes sources touchés par tous les membres du ménage âgés de 15 ans et plus au cours de l'année civile 1970.

Revenu de la famille

Somme des revenus de toutes sources touchés par tous les membres de la famille âgés de 15 ans et plus au cours de l'année civile 1970.

Revenu total et revenu de l'emploi de "moins de \$..."

Pour la population totale, ces chiffres prennent en compte les personnes qui ont déclaré une perte, mais excluent celles qui n'ont déclaré aucun revenu. Toutefois, dans le cas des ménages, des familles et des personnes ne faisant pas partie de la famille, ces chiffres prennent en compte ceux qui ont déclaré une perte et ceux qui n'ont déclaré aucun revenu.

Revenu moyen et revenu médian

Pour chaque personne et les chefs de famille/ménage, ces chiffres sont calculés seulement pour les personnes qui ont déclaré un revenu. Toutefois, dans le cas des familles, des ménages et des personnes hors famille, ces chiffres sont calculés, respectivement pour toutes les familles, les ménages et les personnes hors famille. Le revenu moyen et le revenu médian de l'emploi sont calculés seulement pour les personnes qui ont un revenu de l'emploi. Tous les revenus médians sont calculés d'après les groupes de données indiqués.

Estimates of Reliability

The introductory reports of the 1971 volume series will include measures of reliability in the form of estimates of the mean square error for sets of characteristics covered in that volume. The user interested in obtaining an indication of the reliability of the data for a given characteristic published in the Census Tract reports should refer to the appropriate introductory bulletin in the volume series. For example, to obtain an estimate of the reliability of "ethnic groups", the reader should refer to the Introduction to Volume I (Part 3), Report 92-722.

Copies of the available measures of reliability may also be obtained from the Census User Inquiry Service.

Estimations de fiabilité

L'introduction de la série des volumes du recensement de 1971 renfermera des mesures de fiabilité sous forme d'estimations de l'erreur quadratique moyenne relativement aux groupes de caractéristiques observées. L'utilisateur désireux de connaître le degré de fiabilité pour une caractéristique donnée publiée dans la série des secteurs de recensement devra consulter l'introduction au bulletin approprié de la série des volumes. Par exemple, l'utilisateur devra se reporter à l'Introduction au volume I (partie 3), bulletin 92-722 pour obtenir une estimation de la fiabilité des données des groupes ethniques.

On peut également obtenir des exemplaires des mesures de fiabilité en s'adressant au Service-utilisateurs, Recensement.
